

## Months 1-3

### Complete the SAIL course content on Campus Online

- Work through course content at your own pace
- Interact with peers and expert tutors on the discussion forums
- Complete practical tasks, including working on your project and, gaining feedback from your setting's governing board

## Near the end of month 3

### Attend your allocated live session on Zoom with an expert

- Reflect on your learnings from the course so far
- Seek advice from your cohort's tutor to help you finalise and/or implement your planned project
- Collaborate with peers, sharing AI experiences so far, as well as best practice tips and advice

## At the end of month 3

### Complete and submit your project

- Gain feedback on your project from your setting's governing board
- Submit your plan with your board's feedback to demonstrate course completion
- Download your certificate of completion

## Months 4-12

### Benefit from extended access to resources and discussion forums

- Access an ever-growing library of resources
- Revisit course content to refresh and review your learning
- Read and engage with threads in the discussion forums to deepen your understanding and ongoing learning of this topic and to facilitate your project's success
